DETAILED ACTION

*** This office action is in response to Applicant's Amendment filed July 15, 2007. Claims 21-34 are pending. Claims 1-20 were canceled.

Election/Restrictions

1. Newly submitted claims 25-34, Group II, is directed to an invention that is distinct and species from the invention originally claimed in original claims 21-24, Group I, for the following reasons: Group II, new claims 25-34, is directed to a different method as shown at least in Figures 18-21 for performing ion implantation using the conductive layer patterns as a mask to form the buried impurity diffusion regions; forming a conductive layer over the conductive layer patterns and the buried impurity diffusion regions. Since applicant has received an action on the merits for the originally presented invention of subject matter of Group I, method claims 25-34, Figs 26-28 for performing ion implantation using the photoresist pattern as a mask, removing the photoresist pattern, and sequentially stacking a second polysilicon layer and a metal silicide layer over the first polysilicon layer. This invention Group I, claims 21-24, has been constructively elected by original presentation and examination for prosecution on the merits.

Accordingly, Group II, new Claims 25-34, is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this Examiner's Amendment was given in a telephone interview with Attorney Kenneth Springer on September 16, 2005 for cancel non-elected claims 25-34. Without prejudice, Applicant reserved the right to subsequently file a divisional application for claims 25-34.

IN THE CLAIMS:

*** Cancel claims 25-34.

Allowable Subject Matter

4. Claims 21-24 are allowed for reasons as of record and repeated hereafter.
5. The following is a statement of reasons for the indication of allowable subject matter:

As of record, the references including Hasegawa (5,891,780), Sheng (5,585,297), Chung (5,891,779), of record, alone or in combination, do not anticipatively disclose each and every aspect of the claimed method, or fairly make a prima facie obvious case of the claimed method, in combination with other processing claimed limitations as recited in base claims, the inclusion of, as in claim 21, forming a photoresist patterns on the first polysilicon layer formed on the gate insulation layer, which entirely cover a peripheral circuit region but are patterned in a cell array region to expose regions which are to become buried impurity regions; performing ion implantation using the photoresist patterns as a mask so as to form buried impurity regions near the surface of the semiconductor substrate, wherein the buried impurity regions are parallel, separated from each other by a predetermined interval and extend in the same direction; removing the photoresist patterns, and sequentially stacking a second polysilicon layer and a metal silicide layer on the first polysilicon layer; and sequentially etching the first and second polysilicon layers and the metal silicide layer so as to form word lines, wherein the word lines are parallel, separated from each other by a predetermined interval and extend in the perpendicular direction to the buried impurity diffusion region.
